Pre-AP courses focus deeply on a limited number of concepts and skills with the broadest relevance for high school coursework and college and career success. The course framework serves as the foundation of the course and defines these prioritized concepts and skills.

When teaching a Pre-AP course, teachers have purposeful time and space to bring their own voice and lessons into each unit to best meet the needs of their students and address the full range of state standards. This alignment summary demonstrates the deep connections between the Pre-AP Algebra 1 Course Framework and the Indiana Academic Standards Mathematics: Algebra 1 to support teachers and schools in their planning. Along with the corresponding standards crosswalk, teachers and schools can use this alignment summary when planning and preparing to implement Pre-AP Algebra 1.

Alignment at a Glance: Very Strong

Indiana Academic Standards Mathematics: Algebra 1

- Functions
- Quadratic and Exponential Equations and Functions
- Systems of Equations and Inequalities

Discipline Highlights

- Overall, the alignment between the Pre-AP Algebra 1 Course Framework and the Indiana Academic Standards Mathematics: Algebra 1 is very strong.

- Across all six strands of the Indiana Academic Standards Mathematics: Algebra 1, the majority of standards are covered in full or in part by the Pre-AP Algebra 1 Course Framework.

- The Indiana Academic Standards Mathematics: Algebra 1 and the Pre-AP framework share the deepest alignment within the Functions; Quadratic and Exponential Equations and Functions; and Systems of Equations and Inequalities content strands.

= Very strong alignment

= Partial alignment

Alignment between the Pre-AP Algebra 1 Course Framework and the Indiana Academic Standards Mathematics: Algebra 1 is described as very strong or partial. A very strong alignment is one in which the majority of standards are fully addressed by the mapped Pre-AP Learning Objectives (LOs). A partial alignment is one in which the standards are partially addressed by the corresponding Pre-AP Learning Objectives. Partial alignment can occur when one framework includes greater specificity or extends beyond the scope of the other framework. Given the focused nature of the Pre-AP course framework, some partial alignments are to be expected.
Alignment at a Glance: Partial

### Indiana Academic Standards Mathematics: Algebra 1

- Data Analysis and Statistics
- Linear Equations, Inequalities, and Functions
- Real Numbers and Expressions

### Discipline Highlights

- While the overall alignment between the Indiana Academic Standards Mathematics: Algebra 1 and the Pre-AP Algebra 1 framework is very strong, there are a few areas of partial alignment due to the more granular nature of some of the Indiana Academic Standards Mathematics: Algebra 1.

- The Pre-AP Algebra 1 Course Framework has a more intentionally narrow focus on a prioritized set of concepts, so certain topics are considered outside the scope of the Pre-AP course. For example, standard AI.L.2 addresses solving linear equations and inequalities in one variable. This topic is typically covered in detail in pre-algebra courses, so it was not chosen as a focus topic for Pre-AP Algebra 1.

- Though not fully addressed in Pre-AP Algebra 1, Data Analysis and Statistics is covered in depth in Pre-AP Geometry with Statistics.

### Summary

Beyond alignments to the course framework, it is also important for educators to turn to the Pre-AP Shared Principles and Pre-AP Mathematics Areas of Focus to understand the full picture of alignment between Pre-AP Algebra 1 and the Indiana Academic Standards Mathematics: Algebra 1. The shared principles and areas of focus represent the Pre-AP approach to teaching and learning, and these principles deeply address skill development and disciplinary practices that cannot be easily captured within a standards crosswalk. **In summary, there are ample opportunities for teachers to address the Indiana Academic Standards Mathematics: Algebra 1 with confidence throughout this course.**
